

Mayo Clinic

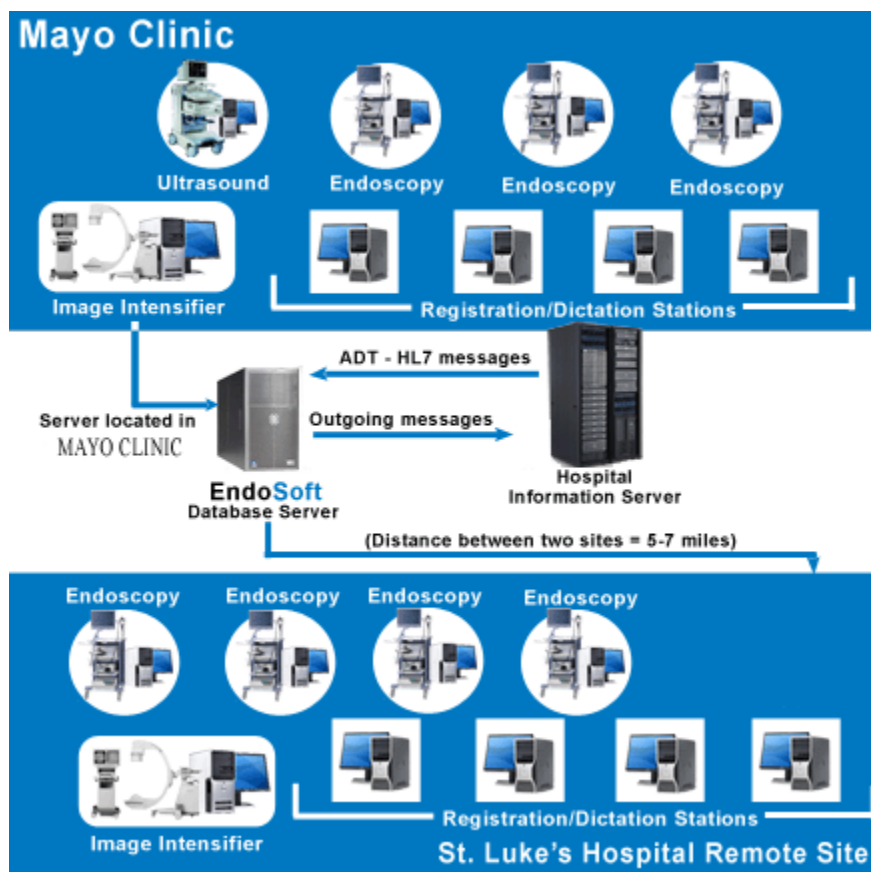

St. Luke's Hospital is a 289 bed facility located in the Jacksonville, FL. It is associated with Mayo Clinic, Jacksonville FL.. This free standing medical center offers a full complement of outpatient services including urgent care, outpatient surgery, and diagnostic imaging.

The Need:

Mayo Clinic is located seven miles from the St. Lukes Hospital main facility. Mayo is a pilot implementation designed to demonstrate a filmless and paperless operation incorporating an Endosoft image and data management system and a Cerner electronic medical record system. The desired results include: improved healthcare delivery to patients; better service to referring physicians; minimized operational costs; and seamless connectivity of patient information between sites.

The Solution:

The Endoscopy Departments of Mayo Clinic, St. Luke's and IS department selected EndoSoft because of its enterprise connectivity and scalability. The implementation includes an enterprise database server, which enables images, reports and patient history to be displayed at any location regardless of acquisition location.

The Results:

"EndoSoft was selected because of its technology leadership, depth of experience in implementing Image and data management solutions, and its commitment to customer service EndoSoft initiated a pre-installation process which included a detailed preparation of documentation and periodic conference calls. EndoSoft installed the complete system over a weekend and worked very closely with the department to trained the clinical and technical staff.
