

EndoSoftVA is designed for the VA hospitals running Vista system. The product was designed in collaboration with VA West Palm Beach, FL. EndoSoft works seamlessly with Vista system without HL7 interface. No need to spend more money with HL7 interface and extra maintenance charges.

- EndoSoft imports patient demographics from Vista and sends back all required information to Vista system.
- EndoSoftVA has all the features of EndoSoftDB and much more.

### Why EndoSoft?

- Problems with Current Process:
  - report writing manual and time consuming
  - requires multiple handoffs
  - # of images per procedure limited
  - image management manual, arcane process
  - prone to human error
- Current process prime candidate for automation & standardization

### Special features and benefits for Researchers:

- Clinical researchers:
  - easy archiving & access to data
  - ability to perform studies cost effectively
- Pharmaceutical research organizations:
  - centralize all research onto single database
  - monitor research for fraud

### EndoSoft PACS

- Priced much lower than other PACS products
- Designed to meet physician needs
- Client server based
- Will require development to make suitable for needs of other medical specialties
