Discover a Complete and Versatile Cloud-Based Application for Your Practice

COST SAVINGS

Qlinical is a cost-effective solution to meet every need. With Qlinical, you get a secure cloud-based application without the server expense and maintenance.

- ✓ ENSURES YOU RECEIVE THE LATEST UPDATES
- ✓ SUBSCRIPTION WEB-BASED DOCUMENTATION
- ✓ NO UPFRONT COSTS WITH SUPPORT & MAINTENANCE INCLUDED

1 IMAGING

Capture, manage, and label HD images and video for your most complete procedure documentation. With Qlinical image management, you can capture images and video from up to four sources simultaneously. Images are time-stamped within the application to automate quality metric documentation, saving clinicians clicks and time while documenting.

2 PROCEDURE DOCUMENTATION

Generate and view procedure reports complete with quality metrics, images, findings, & more. Typical report templates and macros allow for efficient procedure documentation with flexibility. The ability to verbally dictate the report is built into the application, for a type-free workflow. Reports save in PDF creating a portable file that can be easily emailed or printed for your patient.

3 CONSULTATION NOTES

Document your office visit notes and procedure reports in one easy-to-use application. With the consult section of Qlinical you can easily collect and store patient's history evaluation, accurately document progress notes, and even automatically generate your patient consent forms.

4 ANCILLARY MODULES

- Argus for AI Intelligent Report Writing, Polyp Detection & Polyp Sizing
- Electronic Nursing Record (ENR) for Pre, Intra, and Post Procedure Charting to Keep Every Aspect of the Report Electronic and in One Place
- Web-based Scheduler
- Anesthesia Web-Based Module to Standardize and Improve Documentation & Reporting
