

Qlinical ENR Cloud-Based Application

Turns data into documentation with ease. From patient history to procedure reports to vital sign monitoring and scheduling, Qlinical streamlines workflow and increases efficiency. Interface directly with your EHR to create your most complete documentation.

Seamless Efficiency

For a multi-disciplinary approach to documentation and image management. Eliminate the need for duplicate documentation, information flows easily and fills all required fields simultaneously. Integration with point of care devices reduces errors and saves time by automatically collecting vital sign information.

Reporting

- ✓ Customizable Template System
- ✓ Increased Revenue Recognition
- ✓ Patient Satisfaction Reporting
- ✓ Generate Operational, Productivity and Quality Reports

Nursing History Evaluation Post-Procedure Evaluation

The Nursing History Evaluation collects pertinent data including indications for exam, allergies, patient history, medications, prior anesthesia complications and more. Pre-Procedure allows nurses to capture all of the required data prior to beginning a procedure, including NPO status, prep results, advanced directives, sedation plan, anesthesia classification, vitals, allergies, and isolation precautions.

- ✓ 2015 Edition ONC Health IT Certified
- ✓ SGNA & AORN Compliant
- ✓ Integration Directly with EHR, PACS & HIS
- ✓ Point of Care Interfacing
- ✓ Lab Request Autogeneration
- ✓ Discharge Instructions

Automatic Vital Sign Recording

Record and monitor patient vital signs automatically throughout the procedure process.

Patient Tracking

Monitor waiting areas, exam rooms, procedure rooms and recovery bed, efficiently, improving patient satisfaction and productivity.

Nursing Discharge & Charge

The Nursing Discharge documents when the IV was discontinued, prescriptions, ambulation, post sedation score, medication reconciliation, and discharge comments. The Nursing Charge tab accurately tracks items used along with procedure and recovery room utilization.

Nursing Intra-Procedure Evaluation & Post Procedure

The Intra-Procedure Evaluation documents intubation, IV site assessment, vitals, condition log, medicines used, intra sedation score, post-procedure diagnosis and more. Post-Procedure documents a patient's pain scale, IV site assessment, adverse events, level of consciousness, vitals, fluids intake and post procedure comments.

Qlinical Ver 1.0 developed by EndoSoft® LLC is a 2015 Edition ONC Health IT Certified 15.02.02.2721.A117.01.00.0.201015 Electronic Health Record (EHR) application.

This Health IT Module is 2015 compliant and has been certified by an ONC-ACB in accordance with the applicable certification criteria adopted by the Secretary of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services. ONC-ACB Certification 15.02.02.2721.A117.01.00.0.201015 certified on 2020-10-15. There are no additional costs associated with the certified functionality. Further understanding of any disclosures of this certified functionality can be found at the following: Qlinical EHR Disclosures.
