

## EndoSoft Limited

### UK Sustainability Report

Reporting Year: 2026

Scope: UK Operations Only

### Executive Summary

EndoSoft Ltd is committed to operating responsibly and reducing the environmental impact of its UK operations. As a UK-based software organisation, our sustainability strategy focuses on emissions reduction, responsible technology use, and employee-led behavioural change.

In 2025, EndoSoft Ltd established a formal greenhouse gas emissions baseline and set a Net Zero target for 2050, supported by measurable interim reductions. During the 2026 reporting year, we achieved the elimination of Scope 1 emissions and continued progress across Scope 2 and Scope 3.

### Organisational Scope & Boundary

This report covers EndoSoft Ltd's UK operations only. Global operations and targets are managed at parent company level (Utech Products, Inc.).

### Sustainability Governance

Sustainability oversight is provided by the Board of Directors. Emissions are reviewed annually and the Carbon Reduction Plan is updated within six months of each financial year end.

## Net Zero Commitment

EndoSoft Ltd is committed to achieving Net Zero greenhouse gas emissions by 2050 for its UK operations.

## Emissions Reduction Highlights

- Scope 1 emissions eliminated in 2026 through transition to an electric vehicle
- Reduced business travel through virtual collaboration
- Cloud infrastructure optimisation
- Hybrid and remote working adopted

## Monitoring & Review

Performance is reviewed annually.
