

Argus AI Ecosystem™

Learn More at
ArgusML.com

The Argus AI Ecosystem delivers a seamless, intelligent workflow for endoscopy teams.

AI THAT REDUCES PROVIDER BURNOUT

- ✓ AI Trained to Lock onto Your Voice
- ✓ Generate Detailed Reports Accompanied by Real-Time Image Capture & Management
- ✓ Spend Less Time Reviewing Patient Charts

EndoSpeech®

Argus®

Verbalization Software

Real-Time Data Capture with AI

EndoSpeech™, allows physicians to capture their spoken words in real time, during procedures. Using voice profiles, EndoSpeech™ can filter out background speech and understand complex medical terminology.

- ✓ High Quality Transcripts
- ✓ Noise Canceling for Background Conversations
- ✓ User Profiles are Stored and Easily Swapped
- ✓ Specialty & Language Agnostic

AI-Intelligent Report Writer

Natural Language Processing (NLP)

Argus® intelligent report writer uses the EndoSpeech™ transcription to create structured and contextualized data which returns a complete detailed procedure report, saving time after every procedure.

- ✓ Use Your Voice to Capture & Label Images
- ✓ Automatically Timestamp Images & Landmarks
- ✓ Voice Activated Label Printing for Pathology
- ✓ Parse and Organize Procedure Documentation Information
- ✓ Automated Billing Codes

**Argus is clinical decision support software that functions within an EMR, and is not intended for use as a medical device. It does not make a diagnosis, identify suspected adenomas, or direct treatment decisions, but it does organize information for the clinician relating to polyps. It is not intended to substitute for the advice of a clinician. The clinician should always use proper judgment in patient care, and should disregard Argus recommendations where clinically appropriate.*
