

INTEGRATION FOR STREAMLINED WORKFLOWS

Using available HL7® FHIR® integrations, EndoSoft® applications can seamlessly exchange health data bi-directionally with all major third party electronic health records and hospital information systems.

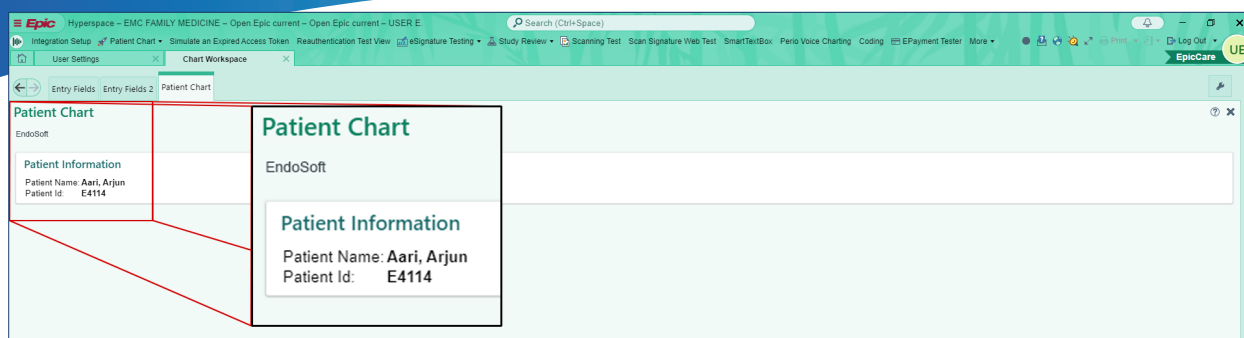

EndoSoft® applications can launch securely, directly from other platforms using SMART on FHIR®, available on Epic® Showroom, Cerner® Marketplace, and any compliant EHR.

Benefits That Reduce:

- | Clinician burnout by easily accessing EndoVault® from within their native EHR/HIS
- | IT deployment times by using the universally standard framework of FHIR
- | Hours of administrative manual entry

Access EndoVault® Directly From EHRs & HIS

Seamless Bi-Directional Data Sharing

Meet evolving interoperability and data-sharing mandates without disrupting your core business operations.
